

BUILT FOR HIGH PRODUCTION

RM-400

PLANER / MILLER FOR CONCRETE AND ASPHALT

- The powerful floor preparation equipment with 400mm working width
- Hydrostatic drive for forward and reverse operation
- Adjustable speed control

- » Aggregate exposure
- » Lippage removal
- » Concrete corrections
- » Removal of multilayer coatings in one pass
- » Levelling of concrete surfaces
- » Roughening and grooving concrete and Asphalt
- » Repair of critical highway points
- » Wet or dry grinding
- » For increased production and money saving

The new RM-400 Machine is a further development of the already experienced line of RM-320 and the Shave-Master SM-320, there is knowledge and experience built in.

The rotating steel drum generates centrifugal force thus throwing the tungsten-pointed, heat-treated steel cutter at the surface to be prepared or corrected.

Side door for easy and quick changing of the working-drum at the job site.

Console lever engages and disengages the transmission; safety-switch built in

Adjustable vibration low handle height for the operators comfort.

Connected with a powerful vacuum unit, an almost dustless operation can be created.

RM-400 has an excellent turning radius by using a differential wheel system.

Easy hydraulic floor disengagement with handle.

RM-400 is equipped with heavy duty wheels for easy rolling over rough surfaces with excellent traction.

Cutting depth indicator clearly shows depth of cutters in the cut.

Working width:	400 mm
Weight incl. drum:	580 Kg
Engine Power:	15 KW, Sec. 32 Amp.
Drive:	hydrostatic
Number of cutters:	90 pcs
Diameter of shafts:	30 mm
Diameter of cutters:	100 mm

NOTHING BEATS THE ORIGINAL

QUALITY - INTEGRITY - RELIABILITY guarantee for service and parts
