BUILT FOR HIGH PRODUCTION

RM=400

PLANER / MILLER FOR CONCRETE AND ASPHALT

- » Aggregate exposure
- » Lippage removal
- » Concrete corrections
- » Removal of multilayer coatings in one pass
- » Levelling of concrete surfaces
- » Roughening and grooving concrete and Asphalt
- » Repair of critical highway points
- » Wet or dry grinding
- » For increased production and money saving

The new RM-400 Machine is a futher development of the already experienced line of RM-320 and the Shave-Master SM-320, there is knowledge and experience built in.

The rotating steel drum generates centrifugal force thus throwing the tungsten-pointed, heattreated steel cutter at the surface to be prepared or corrected.

Side door for easy and quick changing of the workingdrum at the job site.

Console leverl engages and disengages the transmission; safety-switch built in

Adjustable vibrationlow handle heiht for the operators comfort.

Connected with a powerful vaccum unit, an almost dustless operation can be created.

RM-400 has an excellent turning radius by using a differential wheel system.

Easy hydraulic floor disengagement with handle.

RM-400 is equipped with heavy duty wheels for easy rolling over rough surfaces with excellent traction.

Cutting depth indicator clearly shows depth of cutters in the cut.

Working width:	400 mm
Weight incl. drum:	580 Kg
Engine Power:	15 KW, Sec. 32 Amp.
Drive:	hydrostatic
Number of cutters:	90 pcs
Diameter of shafts:	30 mm
Diameter of cutters:	100 mm

NOTHING BEATS THE ORIGINAL
